PROFILE

A highly passionate and creative Web Developer based in Helsingborg, Sweden. Graduated in June 2025 from a vocational college, specializing in .NET web development. I'm a strong believer in personal and mental growth, that's why i always strive to get better with mental and physical health by eating good processed food and workout 3 – 4 days a week, this has also helped me get more creative in various parts of life but mostly when it comes to developing and programming. Since a little boy i have always had a thing for technology but mostly computers, this had a huge impact for me when i choose my education and started writing code for the first time. Since my graduation i been looking to kickstart my career and grow with a competent team where i can further develop my current skills and also make a real impact for the company as a junior developer.

Here are some of my **core** technical skills -

- **Frontend** – HTML & CSS, JavaScript, React, NextJs, TypeScript
- **Backend** – C# (.NET, ASP.NET Core, MVC), Node.js
- **Fullstack UI** – Blazor(Server/WebAssembly)
- **APIs/Data** - REST API:s(Swagger), NoSql, MySql, SQL Server, Azure Cosmos DB
- **CMS** – Umbraco
- **DevOps/Tools** - Agile methods, Github Projects, Jira

WORK EXPERIENCE

Oktober 2025 – Current work	<p>Warehouse Worker, <i>Beslag Design AB</i></p> <p>I Been part time working here att Beslag Design since the start of October 2025 as a Warehouse Worker. My duties involve operating a picking cart to select orders placed via the online shop. After picking all customer items, i carefully pack them into cartons and prepare them for shipment on a pallet.</p>
May 2025 – Part time work	<p>Shop Assistant, Ica Söder Helsingborg</p> <p>Since i graduated i been working part time on Ica Söder Helsingborg. During my shifts I'm doing a variant of things, packing up goods on the shelves so it looks nice and clean in the shop, help my colleagues in the cashier line when it's alot of people in the shop, and first and formost helping the customers navigate and find everything around in the shop.</p>
July 2020 - August 2023	<p>Warehouse Worker, Swea Rör & Stål AB</p> <p>Handled deliveries using a forklift. When i was not operating the forklift, i was stationed at a machine cutting pipes and piston rods according to the customer's order specifications. This required a strong focus and quality managment of the materials. During my time at Swea, i gained significant experience in careful handling, quality control, and planning to meet all work assignments.</p>
June 2017 - July 2020	<p>Shop Assistant, Gekås Ullared AB</p> <p>My work at Ullared gave me experience in service and customer interaction, but I also became excellent at merchandising and keeping my department tidy. During my shifts, I was stationed in various departments, including the cash register, in the warehouse, but primarily on the sales floor. This was an incredibly socially developing job since you were dealing with customer contact more or less throughout the entire shift.</p>
June 2016 - August 2016	<p>Factory worker, Väst kustfilé/Maenor</p> <p>Väst kustfilé was my first formal job where I first tested my stress resilience in a professional environment. It also gave me experience in working independently, though the work was primarily team-based. Responsibilities included carrying out deliveries and, to the largest extent, packaging of goods, along with some machine operation.</p>
